ARTICLE 37

TRANSFERS, JOB POSTINGS AND BIDDING

Section 1. Vacancies

When a permanent vacancy occurs in a Firefighter position, transfers will be governed by the provisions of the Article. As used in this Article, a "vacancy" shall mean a position not occupied due to death, retirement, transfer, resignation or dismissal, etc. of an incumbent or an unfilled, newly created position.

Section 2. Posting

When a vacancy occurs, it shall be posted as soon as possible on all station bulletin boards for a minimum of 14-days. The posting will include the order of bidding*, the vacancies to be created as a result of the original vacancy (i.e., a vacancy in Senior Privates will cause vacancies in Junior Privates and K-Privates). The posting will also include a bidding day scheduled within seven (7)-days after the above mentioned fourteen (14)-day posting period. The Department will make a reasonable effort to notify Employees who are on vacation or sick leave of the scheduled bidding.

*Bidding for positions shall be in the order of vacancy created, i.e., effective retirement date, promotion, etc. In the event of a tie, the bidding shall be according to the incumbent's Departmental seniority.

Section 3. Bidding

On bidding day, all members within a rank will be allowed to bid on vacancies, except as noted at the end of this Section. All bids will be awarded to the member having the most seniority in that rank. After these bids are awarded, an equal number of vacancies will be created. Each member will be allowed to bid on these, and so on for a total of 3-bids in each position. The fourth such vacancy will be filled by the member having the least seniority in that rank. If there is no employee submitting a bid for any of the above vacancies, the Chief shall assign the employee with the least seniority in that rank to the vacant position.

All bidding to fill a vacancy, as well as the resulting vacancies, whether known or unknown at the time of the notice, will take place at the same time. Bids will only be accepted, in writing, prior to bidding to the Chief or designee. When a vacancy involves a promotion to Lieutenant or Captain, the newly promoted member will be transferred to any position not bid by others already in that rank, or the fourth vacancy. The bidding process will not be held up by the promotional process.

NOTE: A successful bidder may not re-bid for one (1)- year from the date of his transfer.

Section 4. Seniority

Transfers under this Article shall be rank for rank and seniority there under is defined as time in rank.

Section 5. Mutual Transfers

Members of the same rank may request, in writing, a transfer by mutual agreement stating all parties involved. These transfers will be allowed, provided all parties involved, including the respective Officer and the Chief, are in accord.

Mutual transfers will not be allowed if one of the members will be leaving the Department within 1-year. If a member retires or resigns within 1-year after a mutual transfer, the other members involved will be re-assigned to their original positions. Also, mutual transfers will not be allowed if one of the members in the proposed transfer was a successful bidder at his present position within the past year.

Section 6. Program Overview

Notwithstanding any of the above, the Chief retains the exclusive right as Chief Executive Officer to finalize all assignments.

Section 7. Transfers from Assignment

Transfers from assignments shall have a minimum notice of one complete work cycle before the effective date of transfer.

ARTICLE 38 CONSOLIDATION

This Agreement shall be binding upon the successors and assigns of the parties hereto, and no provisions, terms or obligations herein, contained shall be affected, modified, altered, or changed in any respect whatsoever by the consolidation, merger annexation, transfer or assignment hereto, or by any change geographically or otherwise in the location or place of business of either party.

GOALS/PROGRAM: To administer the Fire Service Joint Labor Management Wellness-Fitness Initiative (2000 edition): The extent of this program will be implemented as mutually agreed upon. The following two (2) core items are mutually agreed upon- the program is mandatory, and is non-punitive (these two (2) items are not subject to committee approval). All other items of the program will be tailored for the needs of the Lewiston Fire Department, and the individual needs. All equipment will be provided by, and maintained by the City. Individual program objectives are non-punitive.

ARTICLE 40
EMERGENCY MEDICAL SERVICE (EMS) AUTHORIZATION

In the contract that expired on December 31, 2002 the parties agreed to explore the potential to implement a new emergency medical services division within the department. Specifically, the parties agreed:

“The goal of the parties is to develop a plan to increase the manpower, both per shift and total manpower, and to further standardize the retirement for all personnel to a 25-year, no age limit retirement in the next contract. This will be accomplished by implementing a new Emergency Medical Service (EMS) in the new contract, which will include a transporting EMS Division within the Department. The plan will protect all suppression Employees in that they shall not be required to participate in EMS. Both parties understand that this endeavor is a significant undertaking for all and realize that there are numerous details that will need to be addressed. However, it is recognized that such endeavor will not only improve the quality of life for the existing members of the Union, but be a significant improvement in the quality of life for citizens of the City of Lewiston.”

Since the signing of that contract and the signing of this contract, the parties have agreed the potential to improve the health and safety for all citizens and managers alike; can easily be obtained with little or no impact on the property tax payers. However, the parties further understand the community; through their elected leadership will need time to reach the same conclusion. Hence, the language with this section is designed to be mandatory for the parties if the EMS is implemented. However, the decision of whether or not to implement and continue with an EMS system is an exclusive decision of the City's.

In addition, the parties agree that this contract generally and the corresponding changes in this section more specifically, attempts to provide specifics around the changes related to the introduction of EMS into the workplace. At the same time, there is no way to fully anticipate all of the changes and the impacts of the changes. Hence, the following guidelines shall be used by all parties to dictate a course of action where any disputes, misunderstandings, or uncertainties may exist:

1. It is the intent of the parties to insure existing suppression members (hired prior to July 1, 2003) will not be adversely impacted because of the changes or be required to participate in EMS. The parties recognize the existing procedures and policies regarding EMS response by these members effective on November 1, 2003. This language is meant to provide protection for all of the subjects for mandatory bargaining, but not intended to protect Employees from daily inconveniences, i.e. radio traffic of EMS operations.
2. The parties agree that Employees hired after July 1, 2003 shall always be responsible to maintain their required EMS licenses as a condition of hire. Further, such Employees may be required to fulfill any EMS demand, subject to the restrictions of this contract. However, the parties also agree that changing of the existing fire suppression vehicles to a fire-based EMS system has not been negotiated. Even if the entire apparatus is staffed by such Employees, it does not change the status of that vehicle to a fire-based EMS vehicle.
3. The City shall declare a date of "official implementation" of EMS services. That date shall correspond to the first week of operations of the EMS division, as identified by a fully staffed EMS vehicle being available for service, i.e. not to include the period the Employees are working the training/orientation period.
4. The parties agree to allow a year (twelve months) implementation period, beginning on the date of official implementation, where the parties will work through a Labor/Management implementation team to address issues. During this time, changes in plan implementation will likely be necessary. This period will be used to work out the details and cannot be used as precedent by either party. However, under no circumstances can this principle be used to change any item that has been specifically agreed to in this contract with clear and concise language, or to change any existing past practice as it relates to fire suppression operations.
5. During the implementation period, should the Union feel that any proposed changes to accommodate EMS is a violation of the contract and/or past practices, they shall notify the Fire Chief as soon as practical that a concern is known. The parties agree to set aside the period required for formally filing the grievance as outlined in Article 12, Step 1, until thirty (30) days after the completion of the implementation period. At any time, up to that date, any concern that has been raised may be formalized as a grievance by filing of said grievance, consistent with the procedure outlined in Article 12.

6. A number of policies, directives and standard operating procedures will need to be established and implemented in order to assure the effective operation of the EMS Division. These shall be established during the implementation period (Article 40, Section 3).

Each subsection below has already been agreed to by the parties:

- a. Stipends: for all members that either acquired an applicable EMS license by September 1 of the current year or previously held and maintained said license for the entire year, will receive annual stipends. The applicable EMS licenses and stipend levels are found below. The stipends will be paid, regardless of the frequency of use by said employee. Such stipends will be paid on or about December 1 of each year.

Basic EMT	\$100
Intermediate EMT	\$200
Critical Care EMT	\$300
Paramedic	\$600

- b. The City shall be able to pay an additional one time bonus, at the time of hiring, to any new Employee that is a licensed EMT-Paramedic (EMT-P) at the time of hiring. That bonus shall be paid as follows:

25% at the conclusion of the first (1st) month of employment,
25% at the conclusion of the fourth (4th) month of employment,
the remaining fifty percent (50%) at the conclusion of first (1st) year of employment.

The bonus shall be established by the City annually, based in part, on the needs of the City, the employment market, the current and anticipated staff levels, and any other factor(s) deemed appropriate.

- c. EMS Officer: Each platoon will have a permanently assigned EMS officer (three (3) for the entire Department). The individuals in this role shall hold an EMT-P license. The position will be paid on the same pay scale as a lieutenant.

During absences of the EMS officer, the Senior Paramedic eligible, as designated by the Chief, shall be the acting working supervisor for the shift. That member will receive the entry-level pay for a supervisor for that shift, but under no circumstance receive less than five percent (5%) more than his normal hourly wage. To the degree that this language is inconsistent with Article 6, Section 2 of this contract, then this language shall supersede, but only for the compensation of the acting EMS Officer.

- d. The selection of the EMS Officer shall be handled according to the Civil Service process, so long as it exists. However, for the maiden selection process, the parties have agreed to waive this process. Instead, current members at the time of posting, shall be given priority assignment, if

deemed qualified by the Fire Chief. If enough current members are not deemed qualified, then the assignments shall be established by a process deemed appropriate by the Fire Chief.

- e. Wages: All Employees that are assigned to any EMS Division shift shall receive additional compensation for the hours worked, beyond their respective pay, as outlined below. Only those Employees that work an entire shift in the EMS division, held over, or called back, shall receive the additional compensation. "R personnel are entitled to additional compensation.

EMT-P	5% higher
All other EMT licenses	3% higher
Non-licensed Employees	1.5% higher

ARTICLE 41 EMERGENCY MEDICAL TRAINING

Section 1.

The City remains committed to working with LFA to develop an EMR services proposal for the City subject to further negotiations with the LFA and United Ambulance Services. Effective on the date of implementation and response all wage steps in Exhibit D will also be subject to further negotiations

Training:

All Association members not previously certified in a Maine EMS field will be provided by the employer with basic EMR (Emergency Medical Responder) education and certification. All costs for such education and licensure shall be at the employer's expense. Any training of off duty personnel shall be at overtime rates. All necessary continuing education for all employees to maintain standards shall be provided on duty by the employer in accordance with the aforementioned training and compensation requirements. Training shall be conducted in accordance with the requirements of Article 9 Section 4 and shall not occur during nights and weekends.

The parties hereto have set their hands at Lewiston, Maine this 21st day of September, 2017.

Health Insurance Proposal

Introducing City of Lewiston Wellness & Health Care Management System

by

Focusing on Prevention

Health Insurance Addition:

As of the date of the signing of this contract, the parties agree that there has been success with the 'Fire Service Joint Labor Management Wellness-Fitness Initiative' as outlined in Article 39. The parties recognize that the "Fire Service Joint Labor Management Wellness-Fitness Initiative was in fact the forerunner to the City of Lewiston's Health Care Management System.

The City of Lewiston is interested in providing a stable environment for the Employee. Part of this philosophy is echoed in benefit programs such as health insurance. In an effort to curtail rising health insurance costs for both the Employer and Employee, they have developed the Health Care Management System. The same tenets of this System are echoed in the Fire Service Joint Labor Management Wellness-Fitness Initiative; it shall maintain the same philosophy, a healthy Employee and provide reasonably affordable benefits in an arena of mutual cooperation.

All members who participate in the Fire Service Joint Labor Management Wellness-Fitness Initiative will be eligible to receive full health insurance premium credits available, as outlined below, towards health insurance cost containment programs.

Both parties will continue to promote the 'Fire Service Joint Labor Management Wellness-Fitness Initiatives' and demonstrate their support in accordance with Article 39. Firefighting is an inherently dangerous profession, to best serve its residents; health and fitness are some of the principal concerns for all members of the Fire Department. In recognition, the City will provide the resources necessary to continue this program as it currently is defined for the benefit of the residents and firefighters alike.

Cost Containment Efforts:

Annual Physical Exam: Each member (and spouse) shall be required to annually receive a physical exam by his/her Primary Care Physician (PCP). In addition, each member shall take each recommended preventative screenings recommended by his or her PCP.

Health Risk Analysis and Educators: Each member and spouse will be required annually to participate in the health risk assessment*. The individual results of this analysis will not be shared with the City. However, the aggregate results will be shared with the City.

FOR SPOUSES ONLY: If the employee's spouse completes the "Health Risk Appraisal Form" and the physician or their designee completes the "Authorization to Release Medical

Information” forms , and all forms are appropriately filled out and returned to the city’s Health Care Coordinator/Educator (HCC/E) no later than December 31st of each year, the spouse will not be required to meet the HCC/E in any year in which these forms are completed to the HCC/E’s satisfaction. The completion of these forms does not prohibit the HCC/E from contacting the spouse to discuss information contained within those forms.

If desired by the spouse, all meetings and consultations with the HCC/E will be schedule in a private setting. Depending on the results of the health risk analysis and the goals of the member, additional meetings may be scheduled. Should a face to face consultation not be practical, phone and email may be utilized by the HCC/E.

A Health Care Educator (HCE) will be assigned and responsible to work with each member that participates in the program, including spouses. The goal of the HCE is two-fold. First, they are to work with the individual member in assisting them in obtaining personal wellness goals. Such goals shall come from the members’ PCP. However, at the sole option of the member, the goals may be established by HCE. Second, the HCE will inform the City annually if the member met any standard(s) that are required during the year.

The HCE will work directly with the member as frequently as considered necessary in order to assist the members in obtaining their personal goals. Educational and motivation shall be a core component of the HCE’s role. In all circumstances, the HCE will meet at least twice during the year with the member. Meetings are primarily designed to be on the job site and private. Phone consultation and email may be used as an alternative method for meetings, given that at least one of the meetings annually has been in person, unless mutually agreed otherwise.

*Health Risk Assessment is a medical/lifestyle questionnaire that will be circulated annually.

Specific Goals and Measurements: The parties understand that a large percentage of the cost for health insurance is directly related to the actual previous year’s usage of the services covered by the insurance (currently sixty two percentage (62%) of the weighted average method used by the current provider). In order to reduce the cost to both the individual members and the taxpayers of the City of Lewiston, the parties agree to focus efforts of the following three categories. These three categories have demonstrated impact on the usage of health care services.

1. Non-Tobacco Use: all members and spouses are encouraged to become non-users of all tobacco products. In an effort to encourage non-tobacco use, the parties will aggressively explore the potential of making cessation products available at limited or no cost to members and spouses that are enrolled in the program. Uniformed personnel shall not use tobacco products (cigarettes, cigars, and/or chewing tobacco) within or on fire department apparatus, or inside training facilities. A fire department sanctioned tobacco cessation program shall be made available to tobacco users. Tobacco cessation programs must be non-punitive and must include short and long term goals.

2. Exercise Program: all members and spouses are encouraged to meet the exercise requirements that are developed by their PCP. In an effort to encourage members and spouses to maintain a healthy lifestyle, the parties will aggressively explore the potential of making programs and incentives to members and spouses that are enrolled in the program.
3. Weight Management: all members and spouses are encouraged to meet weight management goals that are established for them by their PCP.
4. Best Efforts: Employees and spouses who participate in the program are expected to meet their specific goals by utilizing their 'best efforts'. The program has two goals: First, to improve the health of each Employee and spouse; second, to reduce the long-term cost of health insurance for each Employee and the City's taxpayers. The use of credits is not intended by the City to be a primary source of savings, but as an instrument to make the program important and meaningful.

The City will meet and discuss with the Union in all cases it deems an Employee/spouse has not met this standard. If the HCE has determined that a participant has not met the standard, that individual may utilize their PCP as evidence to the contrary. Any information provided by the individual's PCP shall be given significant weight in the final determination. Each case will be decided on an individual basis and shall not be used as a reference in any way for any other Employee.

Insurance Caps*: The maximum cap a member may pay for health insurance will be subject to the following chart at the applicable out-of-pocket percentage that is elected to be paid by the individual members based on participation in this program. Premium payments between the fifteen percent (15%) to twenty five percent (25%) shall be determined by using the same formula, as outlined below (cap based on a per-week amount):

New employee Health Insurance condition of employment compliance: Employees hired on or after 07-01-07 shall maintain annual compliance with the following criteria:

1. Yearly Aerobic Capacity Test: Successful completion of an Aerobic Capacity test administered by a qualified tester. Parameters of the test are outlined below.
2. Yearly Flexibility Evaluation: Successful completion of a flexibility evaluation administered by a qualified tester.

An employee who does not meet the above listed criteria for non-medical reasons shall be allowed six (6) months and three (3) opportunities from the point of non-compliance to re-establish compliance. Properly documented Medical conditions shall receive appropriate consideration.

Note: This employment condition applies to all employees hired on or after July 1, 2007 and not just those participating in the City Health Insurance Plan.

Dedicated Exercise Time:

Dedicated on duty time for exercise shall be provided. While the scheduling may vary due to emergency calls, special training, and other duties, 60 minutes of every weekday shift is required. The current schedule of weekday training will be amended to include an additional 60 minutes of a mandatory physical fitness session for all firefighters. In the best interest of the members the fitness session will be scheduled at the end of the training period between the hours of 3:00-4:00 p.m. (Monday-Friday) whenever possible. However, the training schedule may be revised to allow the fitness session to occur during normal training periods. Those uniformed personnel working a 37-40 hours or other similar administrative shift shall also be provided the opportunity to exercise during the workday. The health, fitness, and wellness of all uniformed personnel must be maintained as a priority. The Initiative believes that labor and management should work together through this program to ensure full participation by all uniformed personnel.

Note: Dedicated exercise time applies to all personnel and not just those participating in the City Health Insurance Plan.

Peer Fitness Trainers:

The Department shall certify 3 IAFF Peer fitness trainers to assist in the fitness training of on duty firefighters. The peer fitness trainer will be available to develop a personalized exercise program for each employee if requested. The peer fitness trainers shall administer the Aerobic Capacity and Flexibility evaluation in conjunction with a member of the management team. The peer fitness trainer will be responsible for submitting all test results to the HCE for review and approval. The peer fitness trainers shall perform the duty of fitness trainer when in an off duty status. The Chief shall develop and review the peer fitness trainers schedule with the Labor Management Committee.

Note: The HCE will administer the Aerobic Capacity Evaluation for the spouse.

Wellness-Fitness Initiative Tobacco Cessation Policy:

1. Current fire department uniformed personnel shall not use tobacco products (cigarettes, cigars, and/or chewing tobacco) within or on fire department apparatus, or inside training facilities. A fire department sanctioned tobacco cessation program shall be made available for tobacco users. Tobacco cessation programs must be non-punitive and must include short and long term periods.

Evaluation Program Definitions:

Yearly Aerobic Capacity Evaluations*:

Parameters utilizing Central Station Treadmills and Stepmill (protocols are determined by the IAFF/IAFC Wellness-Fitness initiative and shall be jointly agreed upon). All uniformed personnel must understand that the goal of this evaluation is solely for personal fitness improvement. Every uniformed personnel is expected to improve with an assessment and a personalized exercise program.

Yearly Flexibility Evaluation*:

Improvement standard. Flexibility is the functional measure of the range of motion of a joint. It is dependent on the pliability of the surrounding tissue (i.e. muscles, tendons, ligaments). For the purpose of this evaluation, trunk flexion will be evaluated by a sit-and-reach test. This test is commonly used to assess low back and hip flexibility. The test will be administered according to the sit-and-reach test protocol method, the goal of this evaluation is solely for personal fitness improvement.

* Capped Costs

Effective at the signing of the contract thru 1/1/19

% Minimum

Rate – 15% \$95.16

MxHIP

Rate – 25% \$154.54

***the capped costs remain in place unless negotiated otherwise.**

Employee Contributions Percentage Determination: The following shall be used to determine the amount paid, as a percentage, by members for their respective cost of the health insurance coverage, subject to the caps above (until January 1, 2006, all members pay a maximum of 10%.) After January 1, 2006, members are expected to pay up to twenty five percent (25%)* before credits for the cost of health insurance.

(1) Members who have actively participated in the Fire Service Joint Labor Management Wellness-Fitness Initiative, completed annually, the Health Risk Assessment and met the physical exam requirement above shall receive the following credit towards the twenty five percent (25%) payment:

- i. Members with single coverage or single coverage dependent children shall receive ten percentage (10%) credits
- ii. Members with spouse coverage and/or family coverage shall receive ten percent (10%) credit.

- (2) Spouses that are covered by the City's insurance plan shall receive three percentage three percentage (3%) credits if they have completed the annual Health Risk Assessment, participated in the HCE program and met the annual physical exam requirement above.
- (3) Spouses that have met item two (2) and above, may also receive an additional two percentage (2%) credits if they are successful in meeting one of the three categories listed above (i.e. non-tobacco use, exercise, or weight management program). However, only a maximum of two percentage (2%) credits may be obtained.

Under no circumstance may the credits be combined in any fashion to lower the Employee's percentage below an out-of-pocket contribution of fifteen percent (15*%).
 *Effective upon the signing of the contract.

Aerobic Capacity Incentive*: Successfully completing the following three (3) components will yield a yearly \$400.00 bonus for employees and \$300.00 for spouses covered by the City's insurance plan: The employer will schedule evaluations for employees during on-duty hours. Convenient times will be scheduled for spouses with the HCE. Bonus will be paid in the next payroll period from the date the test was successfully completed. Evaluating the aerobic capacity of participants will be conducted using a Treadmill or Stepmill. Measurements of aerobic capacity will be performed at submaximal levels using the Wellness Fitness Initiative protocols. The submaximal aerobic assessments developed for the WFI are based on the heart rate response during a graded exercise. It is important to note that all submaximal tests are based on regression equations and are subject to various prediction errors including: variance in determining target heart rate, heart rate fluctuations due to dehydration, anxiety, and medications. The magnitude and frequency of these prediction errors are reduced by using a well-validated submaximal test and appropriate medical prescreening.

*Effective on January 1, 2018

1. Mandatory Body Fat Analyzer: If standard is not met, then a 40" waist or less for males and 35" or less for females.
2. Aerobic Capacity Test: Successful completion of an Aerobic Capacity test administered by a qualified tester on the candidate's preference of a Treadmill or Stepmill for firefighters. Spouses will perform the test on an appropriately* equipped treadmill. The 2008 WFI calculates target sub-maximal heart rate $(208 - (0.7 \times \text{age}) \times 0.85)$. The Aerobic Capacity Test will be administered in accordance with the WFI (Wellness Fitness Initiative) protocols as outlined in the WFI in regards to the Treadmill and Stepmill testing 2008 edition. A successful completion of the test shall be based upon an Average rating using the attached Maximal Rating conversion charts

(male-female) below. Ratings less than average will exclude the firefighter or spouse from payment of the incentive payment(s).

*Treadmill - The treadmill shall be a commercial treadmill capable of obtaining a minimum of 15%grade and 10mph.

MEMORANDUM OF UNDERSTANDING

The Lewiston Firefighters' Association [hereinafter referred to as the 'Association'] and the City of Lewiston [hereinafter referred to as the 'City'] agree to the following:

The parties agree that the creation of a City Volunteer Corps shall not waive any of the provisions of the Collective Bargaining Agreement existing between the parties. The parties agree that the Volunteer Corps [or similar venture in scope or name] shall be staffed by individuals that have been screened by the City and assigned to the Fire Department. These individuals will provide clerical-type functions only and shall not perform those duties routinely done by the members of the Association. Furthermore, this program shall not in any way create a situation that would limit any member the potential ability to sustain his/her employment status in the event of injury or disease. In the event this situation exists, the City would still provide the opportunity for the employee to maintain their job status by the use of 'light-duty' work assignments until they either return to work or receive approval for disability benefits.
